In accordance with the Section 15(3) of the Human Reproductive Technology Ordinance (Chapter 561) (“the Ordinance”), sex selection by means of a reproductive technology procedure shall not be permitted except for the purposes of avoiding a sex-linked genetic disease specified in Schedule 2 of the Ordinance which may prejudice the health of the embryo, as justified in writing by not less than two registered medical practitioners.

^ Following the adoption of the revised standard licence application form in May 2024, applicants thereafter have to indicate their wish to provide the treatment service “sperm donation” under the licence.
