Remarks:  
 (1) Cases reported include all cycles of IVF, IVF+ICSI and Frozen-thawed ET.  
 (2) The age of wife has been used in calculating the age of patient.  
 (3) In view of the analysis of embryos transferred on live birth rate and multiple pregnancy rate in IVF + ICSI cycles, the statistics of Table 10 (Fresh/Frozen Cycle) was independent from the statistics of Table 11(Fresh) and Table 12(Frozen) as one treatment cycle of a patient could have involved both fresh and frozen embryos transferred.
