

Table 7

Types of RT Procedures in 2010

(Based on the information on Data Collection Forms received from licensed centre up to 31 December 2010)

Types of RT Procedures	No. of Patients	No. of Treatment Cycles
IVF-ET	710	749
IVF+ICSI	2630	3267
GIFT	0	N/A
ZIFT/PROST	0	N/A
Frozen-thawed ET	1832	2435
AIH	3447	5129
Others	49	51
Total:	8668	11631

Remarks:

(1) "Others" include 1 cycle of ICSI with MIFT, 9 cycles of oocyte freezing, 29 failed cycles (involving 28 patients) at the time of oocyte retrieval or at the time of surgical sperm retrieval by MESA/TESE and 12 cycles (involving 11 patients) of donor insemination.

(2) Among 11631 treatment cycles, 997 cycles involved other types of micromanipulation such as assisted hatching, in vitro maturation of eggs, PGD, MESA, TESA or TESE.
